

INDUSTRY TALK 1.0

INTRODUCTION

Are you curious about the exciting opportunities available in the technology industry? Look no further! Industry talk, featuring speakers from Clarity Techworks, will provide invaluable insights into various roles within the tech field that can help shape their future success in today's ever-evolving tech landscape.

UI/UX Designer

- The work is not limited to mobile apps, it also includes websites
- Wireframing and prototyping are 2 important steps in UI/UX design
- Testing and iteration can make the design perfect and without any issues or error

Syarifah's Advice

- Try to find a balance between work and life although it's difficult.
- Communication is an important skill and you need to practice it
- Be punctual and make sure your task is completed at the right time so that the others can proceed with the work

Android Developer

- Implements new aspects and functions for users
- Figure out new ways to make the code better and more efficient
- Does documentations of works done

Ridwan's Advice

- In real work, NO ONE will teach you everything, you need to be independent and self-learn
- Creativity is key to prove that you are better and different than other people
- There is no shame in learning from someone who has superior knowledge than you

QA Testing Analyst

- Ensures the software meet certain quality standard such as do not have bugs before they are released to production
- Does testing by using the test cases created as guidelines performance and security
- Is considered as the last line for the product

Liyan's Advice

Izzah's Advice

- In real work, you can make mistakes, but it is limited
- Making mistake is also a way to learn something faster
- In future, don't feel pressure if we don't land a job right away after we graduate

Izzah's Advice

- You need to be perseverance and resilience in the face of challenges
- It is important to rise again after setbacks, don't give up easily
- It is important to practice good time management

Web & API Developer

- Produces API for internal and external use
- Needs to troubleshoot and provide solutions to problem in backend
- Has to create and manage company's web applications
- Develops and enhances web applications, integrating UI designs based on server logic, and maintaining system documentation

Saiful's Advice

- Choose your friend wisely, do your decision wisely
- Always be curious, always looking forward for the latest technology
- Continuous learning is also a skill needed for web developer, we will be outdated if we don't

CLARITY TECHWORKS

Ms. Syarifah

Ms. Liyana

Ms. Izzah

Mr. Saiful

Mr. Ridwan

Mr. Yee

- Start working on yourself NOW, not after you graduate
- Always develop your soft skills
- You have to LOVE and have PASSION for your work

- Always be curious, learn new knowledges without bound
- Be a Self-learner, and learn all the time, Self-learner will progress the furthest

REFLECTION

In summary, these findings emphasize the necessity of a continual learning mindset, independence, attention to detail, adaptability, and resilience in order to develop a career in the rapidly changing technology environment. It is also stressed that it is essential to have a strong passion for one's job, as obstacles and difficulties will always arise; a lack of enthusiasm can make the task more difficult than necessary, and one will be left behind if they are not as passionate as the rest. Furthermore, the speakers emphasized the importance of creativity, not only within the Art Industry but also within ICT jobs, as critical and unconventional thinking is necessary to overcome and resolve various issues in one's work. The uniqueness of one's solution will set them apart from the competition, thus providing more chances to advance their career.
