INDUSTRY TALK
by CLARITY TECHWORKS SDN BHD

INTRODUCTION

- A fintech company based in Singapore and Malaysia
- The primary product of this company is Rapidz Pay which is a cryptocurrency payment and digital assets ecosystem.
- It provides fintech solution, programming, blockchain technologies, cybersecurity and UI/UX design

REFLECTION

- Clarity Techworks' online meeting on ICT careers focused on the wide range of options available, emphasizing the dependency of roles and the necessity of ongoing flexibility. The presentation's emphasis on new trends and dedication to diversity emphasized how inclusive and dynamic the industry is. As the session came to an end, We were motivated to investigate deeper into various ICT fields and recognize the exciting possibilities of the digital era.

WAY FORWARD

- Introduce well-being programs that prioritize work-life balance and mental health support for our ICT professionals.
- Create a positive and inclusive workplace culture to retain and attract top talents.
- Launch tailored training programs to empower employees with the latest ICT skills.
- Leverage digital platforms and industry events to enhance our employer brand and attract top-tier candidates.
- Create innovation hubs or organize hackathons to encourage creative problem-solving and product development.

CONTENT OF TALK

Android Developer

- Implement new features, resolve bug issues and improve project codes
- Publish the application to the Google Play Store
- Essential skills: analysis, communication, creative and search proficiency
- Mr.Ridwan advises to learn from someone smarter, make connections and start developing software and upload it to GitHub

UI/UX designer

- Use of software like Figma, Slack, Phrase and Postmark to deisgn
- UI/UX research, information architecture, wireframing and prototyping and hand-offs to developers
- Ms.Sharifah advised us to build a strong foundation, and create a powerful portfolio.

QA Testing Analyst

- Responsible for ensuring that softwares or products meet certain quality standards before being released by troubleshooting the products
- To make sure the products are free from any major bugs for users to use and have a great experience
- Ms.Liyana shows us that a software degree can be beneficial for a career in QA testing analyst as the programming knowledge able a QA testing analyst to understand the code being tested well.

Web/API designer

- Develop and enhance web application
- Integrate UI design based on server logic and maintain system documentation
- Used technology such as VS Code to write code, Postman to test API, and Bitbucket to manage codes
- Skill needed: critical thinking, continuous learning, attention to detail, and creativity.
- In Ms.Izzah's sharing, time management, foundation, and real-world application are essential when you are applying for a job.
- Mr.Saiful advises us to choose wisely, always be curious, and learn from mistakes.

The overall message emphasized the importance of foundational knowledge, practical experience, effective communication, and continuous self-learning for success in the tech industry, whether as a developer, UI/UX designer, or QA testing analyst.

EXECUTION SUMMARY

- Clarity Techworks is a technology company made up of different departments, each has its scope of work.
- Each of the departments will collaborate and communicate with each other to fulfil the users' requirements.
- We have gained a preliminary understanding and awareness regarding our future career field which is Information Technology (IT).
- We have learnt the differences between work life and studies in university.
- In university, we learn the knowledge whereas in workplace we learn how to apply the learnt knowledge.
- It is extremely important for us to instil good attitudes and moral values such as independence, passion, and being active in engaging in activities.
- Preparing ourselves by developing some essential skills like soft skills, leadership skills and time management skills will keep us competitive.
- In a nutshell, the key to success no matter what career you are in is whether you are persevering and willing to keep learning until the end of your life.
